

ABSTRACT

SUB  
H8

This invention provides a thin meshy porous body which is made of a metal, a resin, or paper, and which may be suitably used as a core member for a battery electrode or various filter members. Front and rear faces of a thin plate member are embossed so that concave and convex portions of a conical shape are opposite to each other, and an opening is formed in a tip end of each of the convex portions in at least one face.
